

Step 1: Back measurements

Determine the distance from the stool's surface to your shoulders and the top of the head. We will relate these measurements to back height of the seat.

Step 2: Seat measurements

Measure from the wall and the floor to the popliteal point behind your knees. We will relate these measurements to seat height and depth.

Step 3: Call us with your measurements

Call **(800) 451-7247** with your measurements and we will build your custom seat in a chair, rocker or recliner base.

Head Height: _____

Shoulder Height: _____

Popliteal Depth: _____

Popliteal Height: _____
